

The Irish research and development (R&D) tax regime provides a 25% credit for qualifying expenditure on qualifying activities.

This means that companies can now obtain an effective tax deduction of up to 37.5% with the possibility of the value of the R&D tax credit being refunded where there is not a sufficient level of taxable profits within the company/group.

Consider how much money your business spends when trying to develop or improve its products or processes.

Now imagine you could reduce that by 25%.

# FEATURES OF THE IRISH R&D TAX REGIME

Companies are entitled to a credit of 25% of the total qualifying R&D expenditure incurred for periods commencing on or after 1 January 2015. The credit can be used to:

- Reduce the company's corporation tax liability of the period
- Reduce the corporation tax liability of the previous year, or
- If unused, the credit can be refunded by the tax authorities subject to certain restrictions.

The credit is in addition to the normal corporation tax deduction for the expenditure.

The claim must be made within one year of the end of the accounting period in which the expenditure has been incurred. However, many companies are not actually aware that they are carrying out activities that may qualify for this lucrative relief. R&D activities are not limited to those that occur in a traditional research lab. In fact most claims are for experimental development which often takes place right on the factory or shop floor.

### TYPES OF ACTIVITIES BDO HAVE FOUND TO QUALIFY IN THE MEDICAL DEVICE SECTOR

The medical device sector continues to be a vibrant growth sector in which BDO has wide experience. While it is impossible to provide an exhaustive list and each case would have to be reviewed in its own context to assess eligibility, the following are areas where we have, in the past, found qualifying R&D activities in the sector:

- New product development
- Process development and/or upgrade
- Development and/or upgrade of coating solutions/processes
- Developing knowledge and/or capabilities in areas such as:

Catheters

Stents

Occlusion devices

Guidewires

Upstream material selection and component processing

Wire drawing

Heat treatment

Constituent material evaluations.

If you are carrying out some of the above activities contact one of our dedicated R&D Tax Service Team overleaf.

"The BDO R&D team have built up a deep understanding of our business and their advice has been invaluable"
