

BDO HCM IMPLEMENTATION SERVICES CERIDIAN DAYFORCE

Looking for the ultimate Cloud HCM software to help your people and organisations reach full potential?

Introducing Ceridian in partnership with BDO's HCM implementation services.

Dayforce HCM Software

Dayforce is a cloud-based people platform for Payroll, Human Resources, Talent Management, Document Management, and Analytics.

As a single application, Dayforce provides organisations with access to real-time data and results from all domains of HCM.

Organisations can find and hire the right people, create schedules that support work-life balance, manage employee development, process pay and administer benefits, all while monitoring compliance throughout the employee life cycle.

The Dayforce real-time advantage

Dayforce transforms HCM from a collection of disparate systems reliant on fragile interfaces to a single, robust, real-time application.

By providing a single application for all your HCM needs, Dayforce eliminates the pain caused by disconnected applications. With one employee record and one rules engine, all transactions made anywhere within the application flow seamlessly across all functional areas in real-time, eliminating the need for duplicate data entry, manual workarounds, and batch processes.

With a single user-experience, organisations can achieve reduced training time, quicker user adoption, and a faster return on investment.
