

BDO EATON SQUARE OVERVIEW

Sage People Managed Services

for current customers

Sage People is a salesforce based HRIS software that transforms how multinational organisations attract, retain, manage and engage their workforce.

ATTRACT

MANAGE

ENGAGE

Designed for organisations with 200-5,000 employees, it improves productivity across the entire workforce and empowers businesses to connect to their people in a whole new way.

Sage People allows for the automation of a wide range of processes, including talent acquisition, engagement, management, development and planning – combining international requirements with local regulations. With consolidated reporting, dashboards and people analytics, it provides real-time actionable insights across your workforce.

BDO Eaton Square Managed Service Offering

Following a successful “go live” of your HRIS system, it is advised that you evaluate the effectiveness of the system once it has been fully embedded in your work force culture.

At BDO Eaton Square, our team can provide a cost effective and truly powerful Managed Service offering which provides more than just problem fixing. We will work with you to provide consistent and regular support, service and system maintenance for your business, in partnership with Sage.

We can assist you with:

- Enhanced data analytics – get the information you require
- System Health Checks
- Enablement and coaching on your system.

Key Benefits of a Managed Service

- Help to future proof your system - the system will adapt as your company's needs evolves
- Developing a partnership with an expert services provider – our in-house specialists will work with your team to ensure they utilise the software to its full capacity
- Focus on your businesses development – a dedicated account manager that provides you with the knowledge to fully leverage the technology
- Cost control – flexible packages to suit your needs
- Mitigating risk – added security features to minimise risk to the data.

As a Managed Service, we will become the first line of support, working with your team to implement new requirements, enable customers in their system, look at your business roadmaps to ensure we are pro active to solutions rather than reactive to problems.

Our experienced team of HRIS consultants and analysts provide cost effective and comprehensive services to a broad range of companies ranging from small UK-based companies to large multinational firms.

We offer a tailored service to suit the requirements of each individual customer.
